SUPPLEMENTARY FEED FOR BIRDS.

Cometaves Bird is a special product containing all the elements to bring exotic birds and culture birds in optimal shape and to keep them that way.

Cometaves Bird contains 32 elements: vitamins, trace elements, soy proteins and vegetable extracts. All the elements are very well absorbed by the intestines. The birds are active and their feathers are shiny and colourful.

In songbirds, the desire to sing will increase because of their enhanced dominance.

USAGE: Mix 1 filled coffee spoon (5g) of Cometaves Bird with 250g of food.

Administer 2 times a week before, and during the breeding, and in case of stress.

3 times a week after the breeding until the moulting.

Never in the drinking water!

PACKAGE: 70g, 300g en 1kg
